LOCAL SELF-GOVERNMENT DEPARTMENT

Dated Lucknow, the 27th May; 1941."

Report on the working of the District Boards in the United Provinces for the years 1938-39 and 1939-40

RESOLUTION

READ—

Divisional Reviews of Commissioners on the Working of District Boards for the years ending 31st March, 1939 and 31st March, 1940; Annual Reports of the Local Audit Department in the United Provinces for 1938-39 and 1939-40, Annual Reports of Civil Hospitals and Dispensaries for the years 1938 and 1939; Annual Reports of the Director of Public Health for the years ending 31st December, 1938 and 1939, and General Reports on Public Instruction for the years ending 31st March, 1939 and 1940.

OBSERVATIONS

Government regrets that this resolution deals with the reports of both the years 1938-39 and 1939-40, as the former was delayed considerably, while the latter has been prepared earlier than customary. Steps are being taken to ensure that in the future such resolutions should issue annually much earlier than in the past.

Constitution. There was no change in the constitution of any board.

Meetings. The average attendance of members fell further. This was less than 50 per cent. in 19 boards in 1938-39 and in 22 boards in the following year. The number of members in almost every board, who did not attend a single meeting for months together, was by no means, few. The total number of meetings adjourned for want of quorum increased in several boards. The Gonda District Board had the largest number of such meetings in both years, being 18 out of a total of 20 in the first year. The board itself and no other authority has the power to initiate proceedings for removal of a member, who has absented himself for more than three months or three consecutive meetings. The number of such members must be large. Their failure to carry out their duties means that there are frequent adjournments for want of a quorum; this not only causes much inconvenience to other members but also results in serious delays over the transaction of business. Yet boards hardly ever take action against defaulters. A beginning, however, seems to have been made in 1939-40; but this was far from adequate, for as a result only three absentee members were removed. A Commissioner has suggested that "there should be a degree of neglect which would automatically involve removal unless such penalty was expressly remitted by Government". Unless boards become more alive to their responsibility in this matter, some remedy of this kind will have to be considered.

Sub-Committee. With the exception of very few boards notably Meerut, tahsili committees continued to exist nominally. The Commissioner of Meerut states "it is evident that members do not realize the potential uses of these committees. They would prove more useful if certain powers were delegated to them."

It is satisfactory, however, that departmental sub-committees continued to render real assistance to the boards.

Finances

The following are provincial statements of income and expenditure :

Income

Heads	1937-38	1938-39	1939-40	Difference between 1938-39 and 1939-40
	Rs.	Rs.	Rs.	Rs.
Government grants ..	82,55,018	97,00,309	83,10,116	—13,90,193
Local rates ..	74,28,722	73,58,992	73,58,815	—177
Circumstances and property tax.	5,58,586	5,25,039	5,88,316	+63,277

Total, expenditure ..	1,96,11,792	2,00,39,157	2,05,07,301	+4,68,144

The outstanding variation is that Government grants in 1939-40 aggregated about 14 lakhs less than in the previous year. This is accounted for by the fact that in 1938-39, special grants totalling over 14 lakhs were made to Boards from the United Provinces Road Fund, while in 1939-40, these amounted to Rs.70,849 only.

The majority of the boards are again reported to be financially unstable. Eighteen boards spent more than their normal income in 1938-39 and in 1939-40. Several of those, which managed to make both ends meet, are reported to have done so only by neglecting essential services or depleting not only invested funds but also working balances below the minimum statutorily prescribed. The provincial closing balances at the end of 1939-40 were about 8 lakhs less than in the previous year. Both the budgets and revised budgets of several boards were again received late. One Commissioner states "probably there are heavy amounts outstanding against some boards, but the statement of the bills has not been correctly prepared by them."

Accounts.

The incomes of District Boards are of course very inadequate for the discharge of the duties placed upon them of making provision for education, medical relief, public health and communications in the large areas under their control. In view of this, it is all the more essential to see that every rupee is well spent and that there is no wastage and no extravagance. It is because of this that detailed rules regarding the maintenance of accounts and regarding financial procedure have been prescribed, but the reports of the Local Audit Department show that in the years under review, there was no marked improvement in the accounts. In many districts, the accounts of the tax on circumstances and property, of pounds, of schools, of public works and provident funds were again found full of defects and irregularities. Such defects are brought to notice by the Audit Department but the importance of taking steps to remove such defects does not appear to be appreciated. As the Commissioner of the Meerut Division observes : "Continued lack of supervision and non-observance of rules is responsible for illegitimate expenses which continue to exist." The comment of the Auditors in the case of one board, of which the accounts were far from satisfactory may be reproduced :

"From the remarks contained in the foregoing paragraphs, it will be evident that the accounts as a whole stood in need of considerable improvements. The tax accounts were far from satisfactory, and the collection was deplorable. The finances of the board are alarmingly bad. The work of the account section was also not satisfactory owing to ignorance of account rules and procedure. The accounts of education branch particularly in regard to the drawal of arrear pay and scrutiny of acquittance rolls left much to be desired. Supervision over the work of the agriculture instructor was slack. The leases of the Bithur and Ramail ferries and the irregularities in the expenditure incurred over original work deserve special attention of the higher authorities."

In quoting these examples of unsatisfactory accounts, Government do not wish to charge all boards with paying inadequate attention to this side of their work; many are doing good work and the officers and staff of these boards deserve credit for their attention to detail. But Government wish to emphasize the fact that unless correct financial procedure is followed, even in minor matters of detail, it is impossible to ensure that the tax-payers are getting full value for their money.

Circumstances and property tax

The circumstances and property tax is the only direct tax imposed by District Boards; provided it is properly assessed and properly collected, it should prove a valuable addition to the resources of the Board. But the tax, like all forms of direct taxation, is unpopular and the reports of certain Boards throw an interesting light on this problem. Thus the Chairman of one Board reports: "There are heavy arrears, to realise which every effort is being made but the spirit of lawlessness and economic depression stand in the way." The same Chairman added: "The Assessing Officer supervised collections at personal risk and was even assaulted at one or two places along with the police." Another Chairman reports that "Temptation of several *raises* to take undue advantage of the present political tendencies places another difficulty in the way of easy realization of the tax. Correspondence multiplies and even the educated assessees do not respond easily." Some idea of the position in regard to the tax may be gathered from the report from one division where Rs.69,027 was collected at a cost of Rs. 25,345. In the province as a whole the cost of collection amounted to over one-third of the total amount collected. One experienced Commissioner in commenting on the unsatisfactory statistics in his division says: "All this goes to show that the assessing and collecting staff is most unsatisfactory, that the tax is sometimes assessed in a most arbitrary manner and that arrears are accumulating at alarming speed. The efficient administration of such a tax is in fact beyond the powers of a non-official District Board, and so long as they have no hand in the assessment, the revenue authorities are of course unable to help. Nothing but a permanent and responsible staff, strictly supervised in every corner of the district and paid, if possible, by results, can help to cope with it." Some boards have, it appears, recommended the abolition of this tax. However, the fact that difficulties in the levy of this tax are not so inherent, as to be incapable of solution by an efficient District Board administration is indicated by the marked improvement in collection effected in 1939-40 by several Boards in Meerut Division, Meerut securing as much as twenty thousands more than in the previous year.

Pounds.

The statement given earlier in the resolution shows that the income derived from pounds amounts to Rs. 6 lakhs, but if a reference is made also to the expenditure statement, it will be seen that the expenditure under this head amounts to nearly Rs. 4½ lakhs. Thus the net addition made to the assets of the Boards by this source of income is not considerable. But an examination of the figures from

different districts showing the income from and expenditure on pounds shows that this problem merits careful consideration. It is hardly possible to analyse in this resolution the figures for all districts of the province, but some significant facts may be noted. Thus in one division the expenditure per rupee of income from four out of the five districts was between 12½ and 14½ annas ; in one district the expenditure was little over 8 annas and in this district the Board realised Rs. 23,000 at a cost of only Rs. 12,000. In another division consisting of six districts, one showed the small profit of Rs. 115 ; another showed a not inconsiderable profit of over Rs. 10,000 ; the remainder showed profits of between Rs. 1,500 and Rs. 5,000. The Commissioner of Allahabad states regarding administration of pounds in his division in 1939-40 that "The decline in the percentage of expenditure to income in all districts and the increased average profit per pound in all districts except Farrukhabad are very satisfactory". What is possible in one division should not be regarded as beyond achievement elsewhere. However, recently the Governor has permitted Boards to experiment with the alternative method of farming out pounds, in places particularly suitable for this purpose.

The Governor draws attention to these figures bearing on the main direct sources of income.

To deal now with the main heads of expenditure, education represented about 56 per cent. of the total expenditure incurred by the boards. Medical relief and public health, including vaccination together accounted for only 13·8 per cent. The following statement gives the details in regard to educational expenditure : Education

—	1938-39 in lakhs	1939-40 in lakhs	Difference
1. Total Government grants ..	71·95	72·53	+·58
2. Expenditure from boards' own funds.	42·05	43·20	+1·15
3. Expenditure on middle schools for boys.	19·09	19·27	+·18
4. Expenditure on ordinary primary schools for boys.	69·04	69·58	+·54
5. Expenditure on female education	4·04	4·27	+·23
6. Expenditure on education for the depressed classes.	1·89	2·23	+·34
7. Islamia primary schools and maktabs.	3·50	3·51	+·01

It is usually the field of education that displays the more satisfactory features of district board administration. While there was no substantial extension of the compulsory education area, the years under report witnessed a remarkable expansion in other directions and an enthusiastic initiation of what is known as the system of basic education.

The Commissioner of Meerut Division commenting on the educational expansion scheme states in his report for 1939-40 that "its net work of reading-rooms, libraries, adult schools and voluntary workers has done something towards awakening in the masses a desire for literacy. Satisfactory progress is reported throughout the division except in Saharanpur." The basic education system, which has been introduced in selected schools, is still in an experimental stage, but generally the results are said to be encouraging. The movement to secure a more rural bias in village schools is making headway. Greater attention is paid to rural knowledge and agricultural classes, and school gardens are becoming more worthy of the name. The drive towards physical training is widespread and embraces both western and indigenous methods and games to a remarkable extent. Scouting, *lazim* and *lathi* drill, *deshi kasrat*, *kabbadi*, football and volleyball, all have a place.

One very satisfactory feature of the reports is that they show that the importance of female education is being fully realised. Thus the Commissioner of Agra Division observes that "people have begun to realize that it is the education of girls which can more effectively solve the question of illiteracy than the education of boys." There was little increase in the number of girls undergoing instruction in girls' schools, but the number of girls taught in mixed schools showed a very large increase. As observed by the Director of Public Instruction "co-education is not only possible, but is fast becoming popular at the primary stage".

It is satisfactory that interest in Muslims in education is increasing. Generally, effective help and supervision in this direction was received from Muslim Education Sub-committees.

There has been a substantial increase in the number of boys of depressed classes in the ordinary schools. As stated by the Commissioner of Meerut Division, this "tends to show that the age old prejudices against the depressed classes are slowly but surely being lived down with enlightenment".

The neglect of school buildings, however, generally continues.

Medical. The encouragement given by the late Government to indigenous system of medicine is reflected in the medical expenditure of the years under report as follows :

—	1937--38	1938--39	1939--40
	Rs.	Rs.	Rs.
1. Medical Western system ..	18,78,604	18,68,920	19,18,710
2. Medical indigenous system ..	1,60,021	1,73,182	2,04,919

While the number of allopathic dispensaries rose from 445 to 451 only in 1938-39, falling again to 447 in 1939-40, that of indigenous dispensaries, maintained entirely out of district boards funds, increased from 320 to 376 in the year 1938-39 and to 403 in 1939-40.

The number of subsidized allopathic practitioners in 1938-39 was 33 licentiates and 3 graduates ; in 1939-40, 3 more graduates were added. The scheme for subsidized indigenous practitioners was sanctioned by the late Government during 1938-39, and led to the subsidizing of 63 Ayurvedic and 27 Unani practitioners.

It should be possible henceforth to watch closely the comparative popularity of the two systems. The Commissioner of Meerut thinks that " in spite of the Government and boards' efforts in this direction, the rural people appear to prefer English dispensaries ". The Jhansi divisional report indicates that the indigenous system is gaining popularity.

The most regrettable feature is that the grants for the Western hospitals and dispensaries were so small that they could not maintain a high standard of efficiency ; in some cases even grants for medicine were totally inadequate.

Public Health.

The years under report were fortunately healthy. Epidemics were less severe, the death rate falling from 24·96 to 22·08 in the first year and 23·09 in the second, the birth rate showing in the first year a very small decrease from 35·63 to 35·09 and then amounting to 36·26.

The importance of public health work in rural areas cannot be overemphasized, and it is regrettable that only about $3\frac{1}{4}$ lakhs of rupees are available for this purpose, apart from about the same amount spent on vaccination. In 1938-39 the District Health Scheme remained in force in 34 districts. In the subsequent year, this was extended to 3 more districts. As a result of the measures taken for rural development and village uplift, some progress was made in improving sanitary conditions in villages, specially in the matter of water-supply. Maternity and child welfare work was also developed. Unfortunately some boards do not yet sufficiently realize the importance of public health work and the essential need for a permanent health staff.

In 1939-40 an important step forward was taken by Government in the co-ordination of medical and public health staff for dealing with epidemics in rural areas. Previously, a medical officer in charge of a fixed dispensary in a rural area was responsible for dealing with epidemics only in the town or the village, in which his dispensary was situated. Under the new scheme, he will receive reports directly of the outbreak of epidemics in all villages nearer to him than any other such officer, and he will have to proceed there at once and deal with the outbreak till a public health officer becomes available.

Roads.

In discharging their important duty of maintaining communications within their districts, district boards are confronted with a difficult problem and it is not surprising that many boards put forward a claim for further financial assistance from Government. But, as one Commissioner has rightly observed, provincial resources are limited just as are district board resources. The expansion of motor traffic and the heavy increase in many areas of the bullock-cart traffic, due

to cartage of sugarcane from the villages to the factories have enhanced the difficulty of maintaining roads in good condition, especially in those districts where no good road metal is available and all so-called metalled roads have to be constructed of *kankar*. The Provincial Government during the year 1938-39 were able to make non-recurring grants to district boards amounting to Rs.13,89,000 from the Provincial Road Fund and this should have made the position of those boards who received grants a little easier. But non-recurring grants may encourage district boards to open new roads or to metal further lengths of existing roads with the result that they have to meet higher maintenance charges. It is no doubt extremely desirable to improve communications in all the 48 districts of the United Provinces; it is impossible for Government which is already responsible for the main roads of provincial importance to make substantial recurring grants to district boards and it follows from this that any marked or substantial improvement in communications can only be effected if the income of district boards or of the Provincial Government is increased by new taxation. The objections to new or increased taxation are obvious, especially at the present time, and though he recognizes that this suggestion may be open to criticism, His Excellency the Governor feels it necessary to impress on all district boards that no money should be spent on new works, and that all the funds available under the head "Communications" should be spent on existing roads. He must also impress on them the urgent necessity of seeing that every rupee allotted to the maintenance of roads is well spent and is not wasted. That there is a good deal of wastage is clear from the reports under consideration, but some district boards have done their best. Thus the Mainpuri District Board when it first assumed office worked out a definite programme and though disappointed that it did not receive further grants from Government, it has utilized its funds, inadequate though they were, with the result that all roads are passable. In contrast to this is the policy of the Etah District Board which increased the mileage of metalled roads by 15 miles but apparently neglected other roads to such an extent that the Commissioner reports that the condition of some roads is so deplorable that it is expected that the district will have no roads in the near future. Equally pessimistic reports have been received from other districts regarding the progressive deterioration of district roads. His Excellency desires to draw attention to the advice given by one Commissioner, who recognizing the difficulty of providing more funds and the necessity of making the best use of the money available, suggests that much can be done to prevent a road deteriorating to such an extent that expensive special repairs become necessary, by regular and thorough patch work; he suggests also that much economy can be effected by insisting that only good quality *kankar* is used by contractors and by utilizing rubble for soling. The advice is based on the experience of certain district boards in which he found that an energetic district engineer can make a little money go a long way. If the best use is made of the money available, some improvement

should be visible ; that the best use is not made of existing funds is shown by the report of the Hamirpur District Board, which the Provincial Government have had to supersede. In that case it is reported that the Board was known as a syndicate of contractors. Tenders were seldom invited, or if invited and received, were dealt with in such a manner that they did not receive fair consideration.

General.

The old shortcomings persist. No doubt the passage of time has revealed serious defects in some provisions of the District Board Act. Those relating to no-confidence motions create the illusion of tending to safeguard the chairman's position, but essentially do no more than make the proceedings long drawn out. The stalement is frequently prolonged by the stratagems practised by chairman, resulting almost in a paralysis of administration for several months. At the end of this, most often then not the chairman has to make his exit merely because the bare majority, which brought him into power, has turned against him not owing to differences over policy, but because of petty personal controversies. The Chairman's existence thus tends to become as precarious as walking on a tight rope. Then while a statutory minimum expenditure has been fixed for education, its absence for other spheres, such as medical relief, public health and communications, tends to their neglect. But ultimately it is the spirit which infuses a democratic body that matters more than its constitution. It is in this that so many of our local bodies fall short. Factions and personalities too often override the public good. Well thought-out policies and schemes are generally conspicuous by their absence, and there is often an unhealthy and excessive interest in the details of administration and in the question of appointment and contract. There are the rocks on which many a board founders. It is only when there is no other alternative left that Government steps in, much against its will, to try salvage operations by means of supersession. But as a Commissioner has aptly remarked " it teaches nothing and merely means that at the end of three years, the prodigal returns from the wilderness and is presented with a fatted calf ". The real remedy can be found only when enlightened public opinion so asserts itself as to inspire and reward those, who labour for the public good and provide a Nemesis, sure and swift, for those who make their public position a lever for personal interest.

But these criticisms make it all the more necessary to emphasize the existence not only of boards which, though open to criticism in some respects, have also discharged much work, deserving appreciation, but also of those whose administration has been generally good. Among them the District Boards of Dehra Dun, Muzaffarnagar, Pilibhit, Bijnor, Budaun, Muttra, Mainpuri, Etawah, Allahabad, Gorakhpur, Sitapur, Rae Bareli, Jhansi, Unao, Garhwal, Almora and Naini Tal deserve particular mention. The service that the chairmen, members and servants of such boards are rendering to the cause of Local Self-Government is of great value, and the Governor sincerely thanks them. It is to be hoped that the example of these boards, greater supervision by all concerned and an increased realization

by the electorate of their responsibilities will bring an advance in the general standard of administration in the future.

ORDER

ORDERED that the resolution be published in the *United Provinces Gazette* for general information.

ORDERED also that a copy be forwarded to all Commissioners of Divisions, Director of Public Health, Inspector General of Civil Hospitals, the Director of Public Instruction, the Examiner, Local Fund Accounts, District Officers and Chairmen of District Boards, United Provinces, for information.

By order,
R. N. DEY,
Secretary to Government,
United Provinces.

SUPERINTENDENT, PRINTING AND STATIONERY, UNITED PROVINCES, INDIA

Abstract statement of income and expenditure of district boards in the United Provinces of Agra and Oudh for the year 1938-39 required for the Statistical Abstract for British India
